DE WHO? DE GRUYTER!

De Gruyter isn't a megapublisher, but we do know what we're doing – you'd think so after 270 years of publishing. But just because we've been around for a long time doesn't mean we're stuffy – how could we be when we publish *Humor*, the international journal of humor research?

In fact, our fresh and modern attitude to open access, transformative agreements and “read and publish” arrangements have gotten us modest headlines.

Everything we do is based on our values: partnership, courage, openness and competence and our mission includes connecting researchers to scientific knowledge, nurturing interdisciplinary exchange and thus contributing to wider conversations and progress in society.

Provide an Additional Source of Open Access Funding For Your Institution Through Your InfoSci-Books Investment

For any library that invests in IGI Global's InfoSci-Books database, IGI Global will match the library's investment with a fund of equal value **to go toward subsidizing the OA article processing charges (APCs)** for their students, faculty, and staff at that institution when their work is submitted and accepted under OA into an IGI Global journal.*

*The fund will be offered on an annual basis and expire at the end of the subscription period. The fund would renew as the subscription is renewed for each year thereafter. The open access fees will be waived after the student, faculty, or staff's paper has been vetted/accepted into an IGI Global journal as requested by the author(s) of the paper. Libraries in developing countries will have the match on their investment doubled.
